Ask about our Contiguous Revenue Streams from utilizing our STAGsm admin described below:

ROI's STAGsm Admin Svcs are a universal cloud-based health insurance administration and management application that is inbound/outbound to include your products in our Matrix for ROI to bundle and sell and to be utilized for ROI's products to be bundled in your products for you to sell and STAGsm administers. Or, to simply save you time and money by utilizing as your total solution to Admin Management.

This state-of-the-art system securely records and documents every transaction for the health insurance carriers, regional brokers, individual agents, as well as group and stand-alone insurers.

Every aspect of the process is managed under one umbrella including end user registration, tabulation of available plans, payment compliance and processing, dissemination of funds, allocation of sales commissions and complete calculation and processing of A/P and A/R accounts, all in real time. Extensive Carrier EDI library and very affordable prices for new EDI development

The introduction of this end-to-end management tool is currently like no other in the industry and provides a long-awaited breakthrough in managing the complex process of health insurance administration.
