

## [www.Tele-WellAdvisory.com](http://www.Tele-WellAdvisory.com) Network Physicians [www.Tele-WellAdvisory.com](http://www.Tele-WellAdvisory.com)

When you join AmeriDoc's growing legion of members, you can rest assured that each consulting physician resides and works within the United States, and is licensed to practice in his or her respective state. In addition, AmeriDoc's Physician Network draws from a wide range of specialties, with physicians credentialed using the National Committee of Quality Assurance (NCQA) standards. AmeriDoc's consulting physicians are extensively trained to provide you and your family with quality care – regardless of whether you are at home, work, or on-the-go.

Physicians are available 24/7/365 by telephone or email. If you need an Informational Consultation, the consulting physician can provide specific answers to medical questions, or advice regarding non-emergency, routine medical conditions. Should you require a Diagnostic Consultation, the consulting physician may discuss symptoms, recommend treatment options, diagnose many common conditions, or prescribe medication when appropriate. Prior to each diagnostic medical consultation, all physicians are required to review your Medical History for an accurate assessment of your health.

The physician network prides itself in offering quality medical care for all age groups, regardless of pre-existing conditions. Best of all, consulting with a doctor is just a phone call, or mouse click away. Life doesn't stand still. With AmeriDoc, you can now receive real-time medical care, for real life.

Consulting with the AmeriDoc Physician Network provides you with a number of benefits:

**Quality care:** All consulting physicians are U.S.-licensed doctors and board-certified specialists. In addition, all physicians are accredited in accordance with the National Committee of Quality Assurance (NCQA) - supplied guidelines.

**Available 24/7/365:** Call or email a doctor, anytime. The physician network is here to answer your medical questions, recommend treatment options, discuss symptoms, diagnose common medical conditions, and prescribe medication, when appropriate.

**Quick and easy access:** Choose between an Informational Telephone Consultation, a Diagnostic Telephone Consultation, or by Secure Email.

Plans Marketed by Tele-Well Advisory

Every possible step is taken toward ensuring the quality of the care provided through our Telemedical Service Partners. This involves a strict credential verification and review process for the doctors in the Ameridoc Physician Network. VerifPoint is fully NCQA Certified and Accredited by URAC.

URAC, an independent, nonprofit organization, is well-known as a leader in promoting health care quality through its accreditation and certification programs. URAC offers a wide range of quality benchmarking programs and services that keep pace with the rapid changes in the health care system, and provide a symbol of excellence for organizations to validate their commitment to quality and accountability. The National Committee for Quality Assurance is a private, 501(c)(3) not-for-profit organization dedicated to improving health care quality. The NCQA seal is a widely recognized symbol of quality. Organizations incorporating the seal into advertising and marketing materials must first pass a rigorous, comprehensive review. For consumers and employers, the seal is a reliable indicator that an organization is well-managed and delivers high quality care and service. [Click here to view.](#)

VerifPoint is a leading Credentials Verification Organization (CVO) based in Lake Forest, California. VerifPoint offers credential verification services to improve and expedite the credentialing process of healthcare providers. Fully certified by NCQA (The National Committee for Quality Assurance) and accredited by URAC, VerifPoint provides primary source verification that meets industry and regulatory standards such as NCQA, TJC, URAC, CMS and AAAHC. VeriSign, Inc. (Nasdaq: [VRSN](#)) is the trusted provider of Internet infrastructure services for the networked world. Our Marketing Partner has partnered with Verisign to bring the strongest encryption available. Standard SSL Certificates enable a minimum of 40-bit and up to 256-bit SSL encryption. Certain older browsers and operating systems will achieve only 40- or 56-bit encryption unless there is a Server Gated Cryptography (SGC)-enabled certificate on the server. **VeriSign Secure Site Pro with EV** is an SGC-enabled SSL Certificate, enabling 128- or 256-bit encryption for over 99.9% of Internet users.
